Variables and Data Types

Variable Assignment

>>>	x=5
>>>	X
5	

Calculations With Variables

>>> x+2	Sum of two variables
7 >>> x-2	Subtraction of two variables
3 >>> x*2	Multiplication of two variables
10 >>> x**2	Exponentiation of a variable
>>> x%2	Remainder of a variable
>>> x/float(2)	Division of a variable
2.3	

Types and Type Conversion

str()	'5', '3.45', 'True'	Variables to strings
int()	5, 3, 1	Variables to integers
float()	5.0, 1.0	Variables to floats
bool()	True, True, True	Variables to booleans

Asking For Help

>>> help(str)

Strings

```
>>> my string = 'thisStringIsAwesome'
>>> my string
'thisStringIsAwesome'
```

String Operations

```
>>> my string * 2
 'thisStringIsAwesomethisStringIsAwesome'
>>> my string + 'Innit'
 'thisStringIsAwesomeInnit'
>>> 'm' in my string
```

Lists

```
>>> a = 'is'
>>> b = 'nice'
>>> my list = ['my', 'list', a, b]
>>> my list2 = [[4,5,6,7], [3,4,5,6]]
```

Selecting List Elements

Index starts at o

Also see NumPy Arrays

Subset

Jub	300	
>>>	my_	_list[1]
>>>	my_	list[-3]
Slic	e ¯	_

- >>> my list[1:3] >>> my list[1:] >>> my list[:3] >>> my list[:]
- **Subset Lists of Lists** >>> my list2[1][0]
- >>> my list2[1][:2]

Select item at index 1 Select 3rd last item

Select items at index 1 and 2 Select items after index o Select items before index 3 Copy my list

my list[list][itemOfList]

List Operations

```
>>> my list + my list
['my', 'list', 'is', 'nice', 'my', 'list', 'is', 'nice']
>>> my list * 2
['my', 'list', 'is', 'nice', 'my', 'list', 'is', 'nice']
>>> my list2 > 4
```

List Methods

>>>	<pre>my_list.index(a)</pre>	Get the index of an item
>>>	<pre>my_list.count(a)</pre>	Count an item
>>>	<pre>my_list.append('!')</pre>	Append an item at a time
>>>	<pre>my_list.remove('!')</pre>	Remove an item
>>>	<pre>del(my_list[0:1])</pre>	Remove an item
>>>	<pre>my_list.reverse()</pre>	Reverse the list
>>>	<pre>my_list.extend('!')</pre>	Append an item
>>>	<pre>my_list.pop(-1)</pre>	Remove an item
>>>	<pre>my_list.insert(0,'!')</pre>	Insert an item
>>>	<pre>my_list.sort()</pre>	Sort the list

String Operations

Index starts at o

```
>>> my string[3]
>>> my string[4:9]
```

String Methods

>>> my_string.upper()	String to uppercase
>>> my string.lower()	String to lowercase
>>> my_string.count('w')	Count String elements
>>> my_string.replace('e', 'i')	Replace String elements
>>> my_string.strip()	Strip whitespaces

Libraries

Import libraries

>>> import numpy

>>> import numpy as np Selective import >>> from math import pi

pandas 🖳 💥 🕍

Data analysis

Scientific computing

***** matplotlib 2D plotting

Install Python

Leading open data science platform powered by Python

Free IDE that is included with Anaconda

Create and share documents with live code. visualizations, text. ...

Numpy Arrays

Also see Lists

```
>>>  my list = [1, 2, 3, 4]
>>> my array = np.array(my list)
>>> my 2darray = np.array([[1,2,3],[4,5,6]])
```

Selecting Numpy Array Elements

Index starts at o

```
Subset
>>> my array[1]
```

Slice

```
>>> my array[0:2]
  array([1, 2])
Subset 2D Numpy arrays
>>> my 2darray[:,0]
  array([1, 4])
```

Select item at index 1

Select items at index 0 and 1

my 2darray[rows, columns]

Numpy Array Operations

```
>>> my array > 3
 array([False, False, False, True], dtype=bool)
>>> my array * 2
  array([2, 4, 6, 8])
>>> my array + np.array([5, 6, 7, 8])
 array([6, 8, 10, 12])
```

Numpy Array Functions

```
>>> my array.shape
                                      Get the dimensions of the array
>>> np.append(other array)
                                      Append items to an array
>>> np.insert(my array, 1, 5)
                                      Insert items in an array
>>> np.delete(my array,[1])
                                      Delete items in an array
>>> np.mean(my array)
                                      Mean of the array
                                      Median of the array
>>> np.median(my array)
>>> my array.corrcoef()
                                      Correlation coefficient
>>> np.std(my array)
                                      Standard deviation
```
